MASTODON the BIG PAYING Everbearer

J. N. ROKELY & SON

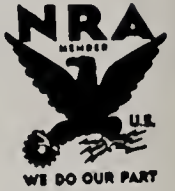

BRIDGMAN, MICHIGAN

J. N. ROKELY.

To Our Customers

We present this, our 23rd Annual Catalog, with the earnest desire that it will be of service in making your fruit growing more profitable and beautification of your home grounds easier and more successful. We have tried to tell you in our own words the truth about our goods, avoiding extravagant claims and promises so likely to lead to disappointment.

Rokely's have enjoyed, for forty-five years, a steady growth based, not on flashy advertising, but on fair dealing, reasonable prices and nursery stock of the highest quality. Year after year we have learned how to grow better plants and we are positive that no better stock can now be produced. Our overhead is low and our advertising sensible, and these savings are passed on to you in our money-saving prices.

In our struggle to give our customers better plants, we have been aided greatly by our location. The soil of Berrien County is deep, rich and loose. Lake Michigan tempers our climate, and rainfall is abundant. It is not surprising that this county is first in the United States in yearly production of strawberry plants. New customers are surprised first by the enormous root systems and later by the marvelous yields of these sturdy plants. And of all this marvelous stock, none is better than Rokely's. Nor does any nursery of our size and reputation sell at prices as low as ours.

Both of us live here on the farm and devote ourselves to this business. Every order receives our personal attention until it is shipped. Errors and complaints are cheerfully adjusted to your entire satisfaction.

We thank our customers for their continued liberal patronage. If you are receiving this catalog for the first time, we hope for a chance to prove that we can please you and save you money.

Yours very truly,

J. N. Rokely & Son

A. J. ROKELY.

Cash Discount on Early Orders

We will allow the following discounts from **CATALOG PRICE** on all orders for \$5.00 or more accompanied by **CASH IN FULL**:

- January 1st to January 30th 10 per cent discount
- February 1st to February 28th 8 per cent discount
- March 1st to March 31st 5 per cent discount

This offer does not apply on Bargain Collections. All Bargain prices are NET and subject to no discount.

STRAWBERRIES

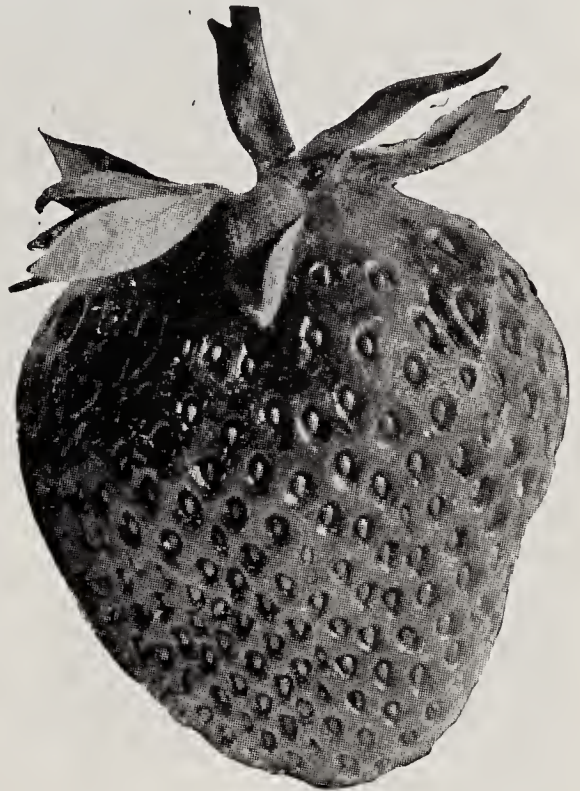

Early Varieties

Beaver

One of the newer varieties recently originated in Wisconsin and rapidly taking its place among the leading kinds. It is a cross between the Dr. Burrill and Premier, retaining all the valuable fruiting features of the Premier and in addition, like Dr. Burrill, makes new runners freely.

Beaver is a perfect blossoming plant, with dark green foliage, very strong and vigorous, good runner maker and drought resister. The berries are of a deep glossy red which extends over the entire berry to the heart of the fruit. It is very productive, hardy and firm and of such texture that it does not require picking more than twice a week. While we class the Beaver as an early variety, it extends its fruiting over such a long period of time that it may also be classed among the later varieties. Rich, mild flavor, high color and firmness are some of its superior qualities, and predictions are that within a short time it will be the leading canning berry. In addition it is unsurpassed as a shipper. Leading growers are planting large acreage to Beaver, as its ability to stand up under extreme conditions, rich color, size, and attractive appearance command the highest market price.

We recommend this berry highly to commercial growers especially where soil is poor or late frosts usually injure blossoms.

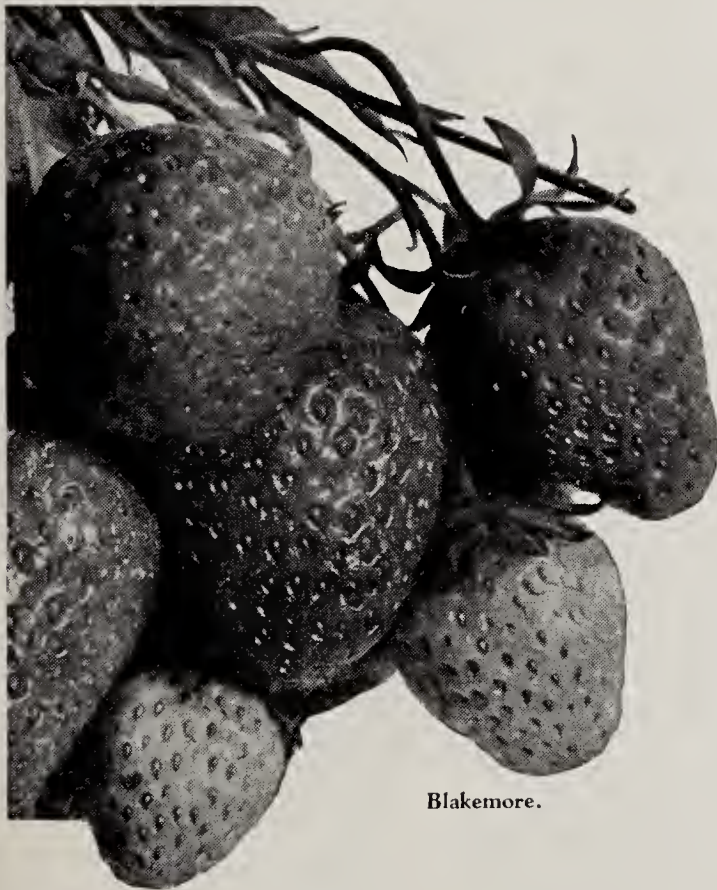

Beaver.

Blakemore

The Blakemore is an outstanding variety recently originated and developed by the U. S. Department of Agriculture. It is a cross of Missionary and Premier and has been thoroughly tested, tried and subjected to all kinds of trials before being introduced.

The Blakemore is extra early, ripening same time as Beaver, and four to five days before Premier. Berries are bright red, with tough skin, firm flesh, and a wonderful mild flavor. Because of its firm flesh and tough skin the Blakemore has proven a good long distance shipper and will remain on the vines a considerable time after ripe without loss from over-ripeness or rotting. Blakemore is a vigorous grower, and runners are produced freely, with foliage quite resistant to leaf spot. Perfect flowering.

We especially recommend the Blakemore to commercial growers where weather conditions or lack of help prevent keeping berries picked up closely.

Blakemore.

8,000 plants—all for \$22.00

Bargain No. 2

Premier.

main crop. It has proven itself for many years and in many places.

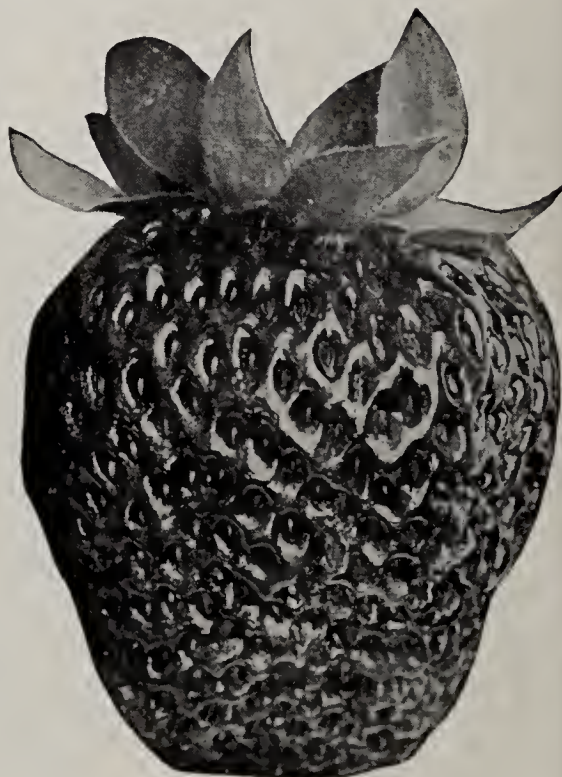

Red Gold

Originated in Iowa and now widely grown. It is a splendid plant maker, blossoms heavily, and sets a good crop of large size fruit. Produces extra large, brilliant red berries with tender flesh and sweet, melting flavor. The one outstanding point of value in Red Gold is its distinctive, delicious quality, making it a fancy table berry.

Midseason Varieties

Cooper

Cooper is especially adapted to fancy, local market trade, where its large size and attractive appearance result in quick sales at high prices. This variety makes a wonderful growth of foliage, the plants standing erect and presenting a beautiful appearance on account of their great size. The fruit stems, which are protected by the foliage, are very stocky and erect and set a heavy crop of berries. The berries are very large in size and have a rich, luscious flavor all their own. Commence ripening in mid-season, bearing an enormous crop of fruit

Cooper.

Dr. Burrill

Dr. Burrill is now generally recognized as being identical with Senator Dunlap. However, we have kept our original strain of Dr. Burrill pure and can furnish plants from this strain if desired.

Premier

This variety has established itself as the leading money-maker among all early varieties of Strawberries. The exceptionally satisfactory and unusually profitable crops secured from Premier have made it first choice among all successful Strawberry growers throughout the country who have found from their own experience that Premier will produce more dollars per acre, with a bigger crop certainty, than any other variety offered today.

The plants are sturdy, healthy, and long-rooted, making them drought resistant, while the foliage is a beautiful dark green and very abundant. Premier seems to be the nearest frost-proof of any variety grown, because of its great hardiness and persistent blooming.

The vines bear an enormous crop of large, uniform sized berries, while the berry is bright red clear to the center, is perfect in shape, and ripens without green tips. The fruit presents a very pleasing appearance on the market and possesses a flavor equal to any of the later varieties, which is very unusual in an early berry.

We have a fine stock of Premier plants and you cannot go wrong in using Premier for your

Gibson

Also known as Parsons' Beauty. An unusually safe variety for commercial planting, inasmuch as it always produces a big crop of large marketable berries, seeming to thrive equally well in all sorts of soils and climates. The berries are large, holding their size to the end of the season, and are all that could be asked for in color, flavor, firmness, and productiveness. The plants are long rooted and will withstand much dry weather. Foliage very rank, affording protection for blossoms and fruit. Fruit stems large and strong. Excellent for canning and general home use.

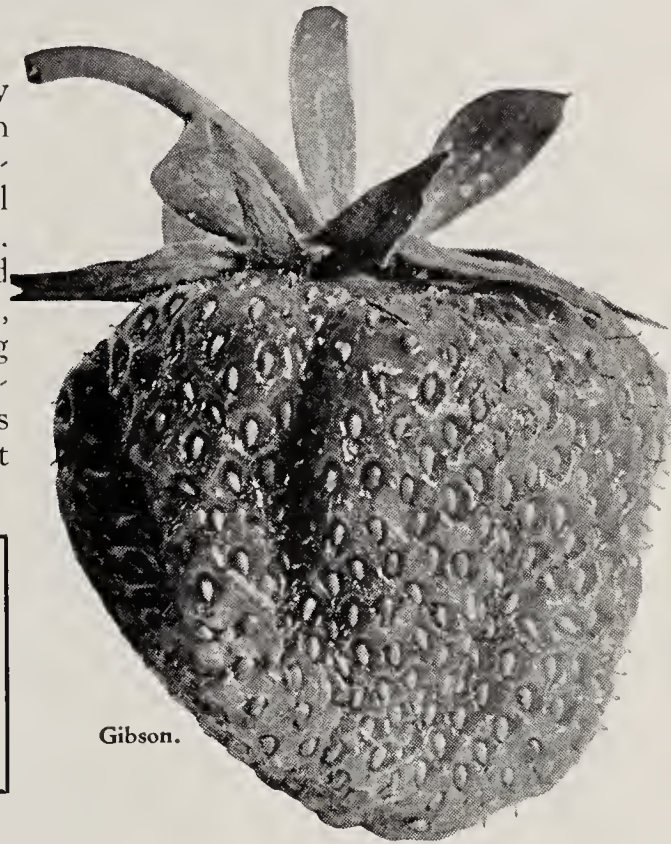

Special Home Garden Offer

Enough berries for the family and some to sell.

BARGAIN No. 3

100 Blakemore.	100 Aroma.
100 Premier.	100 Mastodon.
100 Sen. Dunlap.	All for

\$3.20

Gibson.

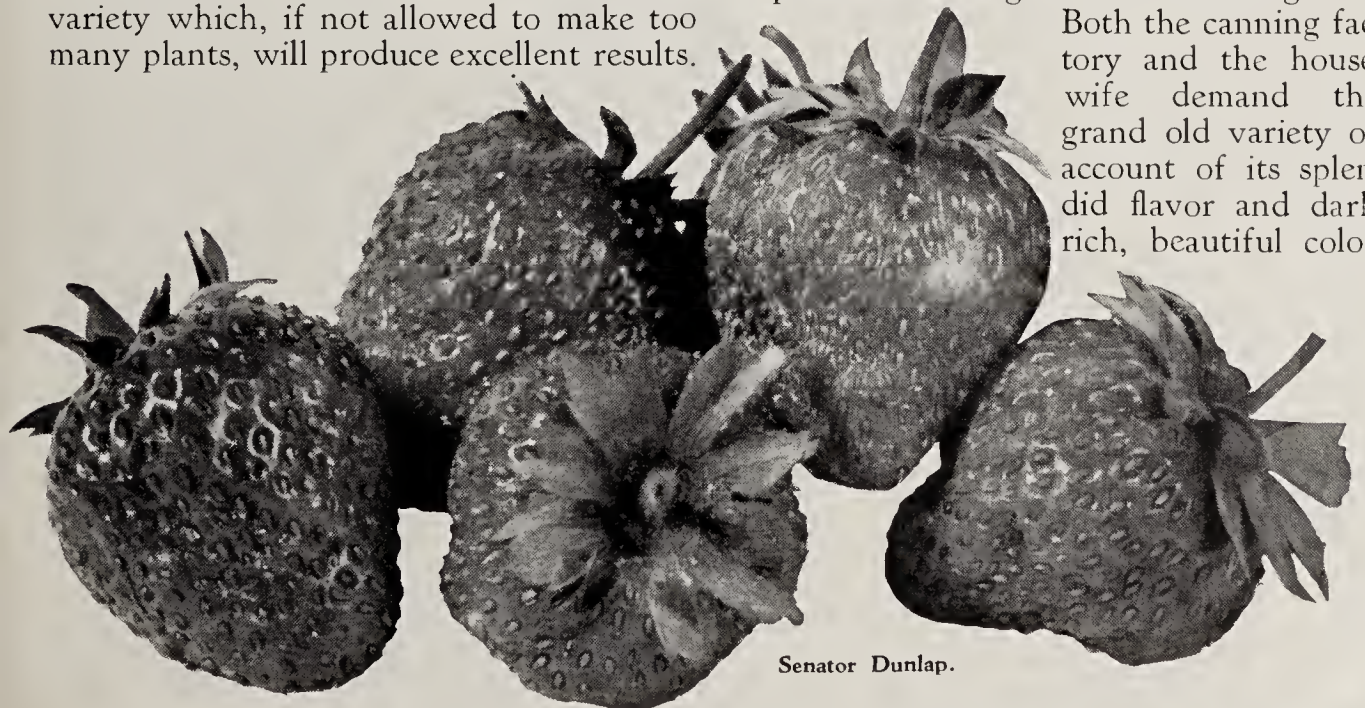

Harvest King

Harvest King blossoms late, thereby protecting itself from late spring frosts, and then matures its fruit so rapidly that it ripens with Gibson, Senator Dunlap, and other mid-season varieties. The berry is a deep red color, delicious flavor, large in size, and is the best canning berry, as it retains its original flavor and dark red appearance even after cooking. A heavy bearer and a good shipper. Foliage is abundant and healthy. Fruit stems are semi-rigid, holding fruit well off the ground when fully ripened. A heavy plant maker and a variety which, if not allowed to make too many plants, will produce excellent results.

Senator Dunlap

An old standard variety that has been widely grown in the middle and northern states for many years. It produces wonderfully large crops of handsome dark red berries of the highest quality. The plants are medium in size, hardy, long rooted, very prolific, and will hold their own under most any rough and tumble methods of cultivation. If allowed to grow unrestricted they will cover the ground with a mat of vines but for best results they should be kept down to a good sized fruiting row.

Both the canning factory and the housewife demand this grand old variety on account of its splendid flavor and dark, rich, beautiful color.

Senator Dunlap.

Washington.

Washington

Washington is a very late perfect blossom variety. Bears immense loads of fruit on stems well off the ground, is a fine plant maker, with heavy foliage, large glossy leaves of high luster. Deep glossy red berries, very large in size, having the most delicious flavor of any Strawberry. Very juicy and requires almost no sugar. Very firm, and will stand for days without softening and will present an excellent appearance. A Michigan introduction and highly recommended by many growers.

Late Varieties

Aroma

A good late variety long considered the standard late market Strawberry. It is still grown extensively in all sections of the country, but is especially popular in the Southern States. It produces a quantity of large berries, uniformly round in shape and deep glossy red in color. The plant is a hardy grower in any climate, producing healthy, dark green foliage. The berry has a pleasing aromatic flavor peculiar to this variety alone. It is a fancy berry and brings top market anywhere. On account of its exceptional firmness it is an ideal long distance shipper.

Pearl

The Pearl is undoubtedly the latest June variety. In the north it does not come into its prime until the very last of June and early July. The fruit is large in size, dark red to the center, firm, and a good shipper. The prominent yellow seeds add to its attractive appearance. Flavor is excellent and it is a heavy and sure cropper. When Pearl is at its best the other varieties are off the market so you cannot go wrong in adding Pearl to your list for an extra late berry.

SURPLUS PLANTS

During our packing season we usually have surplus plants of some varieties left over in the packing house at the end of each day. These plants are all put in a bin and we offer them to you at this special price. These plants are first-class stock, freshly dug, and carefully packed but we cannot label with variety name nor can we send you any one variety. In ordering this stock, ask for "Surplus Plants" giving quantity wanted.

\$2.50
per 1000

Aroma.

Everbearing Strawberries

Mastodon

Ever since the introduction of the first everbearing varieties, years ago, growers have been waiting for a commercial everbearing strawberry that has size, flavor, productiveness and shipping qualities. The Mastodon has all of these qualities, and more. The plant, unlike other Everbearers, is big, thrifty, with an ideal root system that enables it to produce its enormous crop of fine large berries even under trying conditions. The Mastodon is the largest, and heaviest yielding everbearing strawberry yet introduced.

Mastodon berries are the largest of any known Everbearer. Not just a few, but all the berries, are fully twice the size of the average Everbearer. Neither do they become small during the latter part of the bearing season but retain their large size to the last berries. Berries are glossy red in color and with bright yellow seeds present a beautiful appearance. Flavor is rich and good. The Mastodon plant is large and bushy with a thrifty foliage that protects the berries from hot suns as well as fall frosts. The most prolific plant maker of the Everbearers.

Planted in early spring, the Mastodon begins to ripen its fall crop about July 15th and continues through August, September, and October. Not only do they produce a big money crop the same summer and fall after planting, but another big crop the following spring with other berries. After a rest of about six weeks they will then put out new fruit stems and bear a third big crop during the fall months. Send in your

Mastodon.

Mastodon order early and avoid disappointment as Mastodon plants are very scarce this year.

Champion

Until the introduction of the Mastodon, Champion was the leading Everbearer and is still preferred by many for home use as the flavor is rich and pleasing. The Champion bears large quantities of medium size berries, uniformly conical in shape, and a beautiful dark red to the center. Plants are medium in size and thrifty.

STRAWBERRY PRICE LIST FOR 1934

(500 or more of any one variety at the 1000 rate.)

Cumberland.

Black Raspberries

Cumberland

No Blackcap has ever been grown as extensively as Cumberland, nor attained its great popularity in all raspberry producing sections of the country. Cumberland plants are healthy, vigorous growers, throwing up stout, stocky, well-branched canes that produce immense crops of wonderful berries. Fruit is a rich black in color, firm, large, and of the highest quality. The bush is absolutely hardy, withstanding most severe winters unharmed. If you want a money-maker, plant Cumberland.

Logan

Here is a new extra early Blackcap. Originated in Ohio it ripens 7 to 10 days earlier than the Cumberland. It is a heavy yielder, with berries as large or larger than the Cumberland. Its most outstanding characteristic is its resistance to mosaic and other raspberry diseases. Logan grows fast into strong, sturdy bushes that are great drought resisters. Berries never crumble or become small or seedy.

BLACK RASPBERRY PRICES FOR 1934

	25	50	75	100	200	300	400	1000

(500 or more plants of one variety at 1000 rate).

Red Raspberries

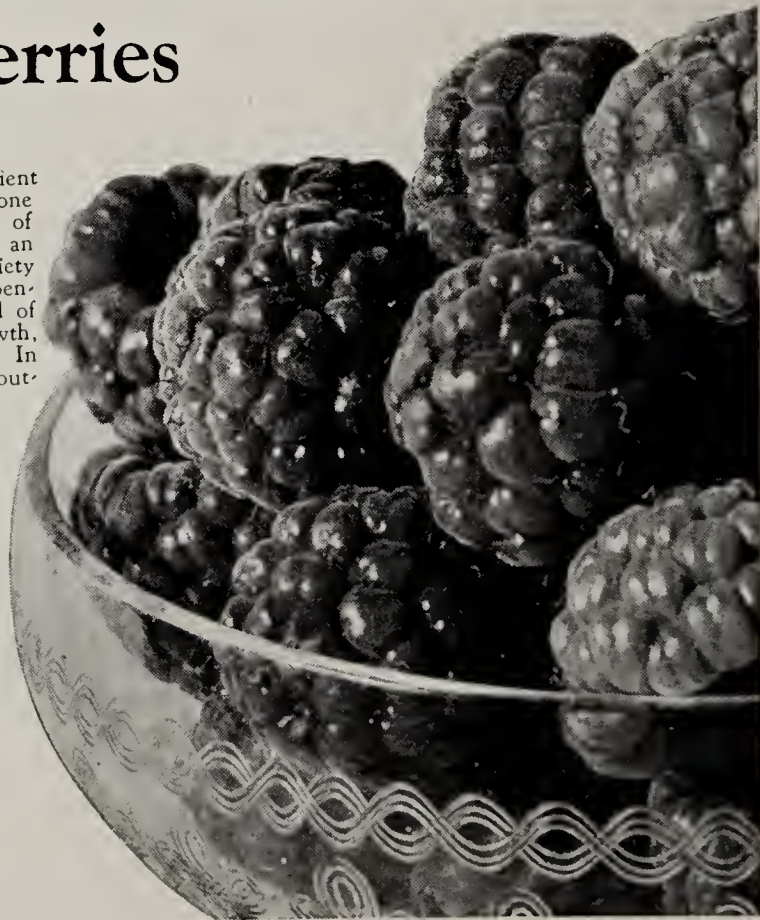

Chief

The Chief is a new variety which has had sufficient testing in commercial fields to safely place it as one which is going to replace all other early varieties of Red Raspberries. It could rightly be called an Early Latham because it resembles that variety in many ways, but is a week to ten days earlier in ripening. The fruit is of good size, bright red, firm, and of excellent quality. The plants are vigorous in growth, perfectly hardy and seem to be resistant to mosaic. In test plots Chief has proven a heavy yielder, even out-yielding the Latham, which, up to the introduction of the Chief, has been our heaviest yielder. Chief has all the good qualities looked for in a raspberry; earliness, hardiness, quality of fruit, and yield. We strongly urge you to get started in this money-making variety this year.

We are offering Chief in 1-year medium grade this year. These plants are thrifty, well rooted stock, sure to grow and do well, but not heavy enough to class as 1-year No. 1.

Cuthbert

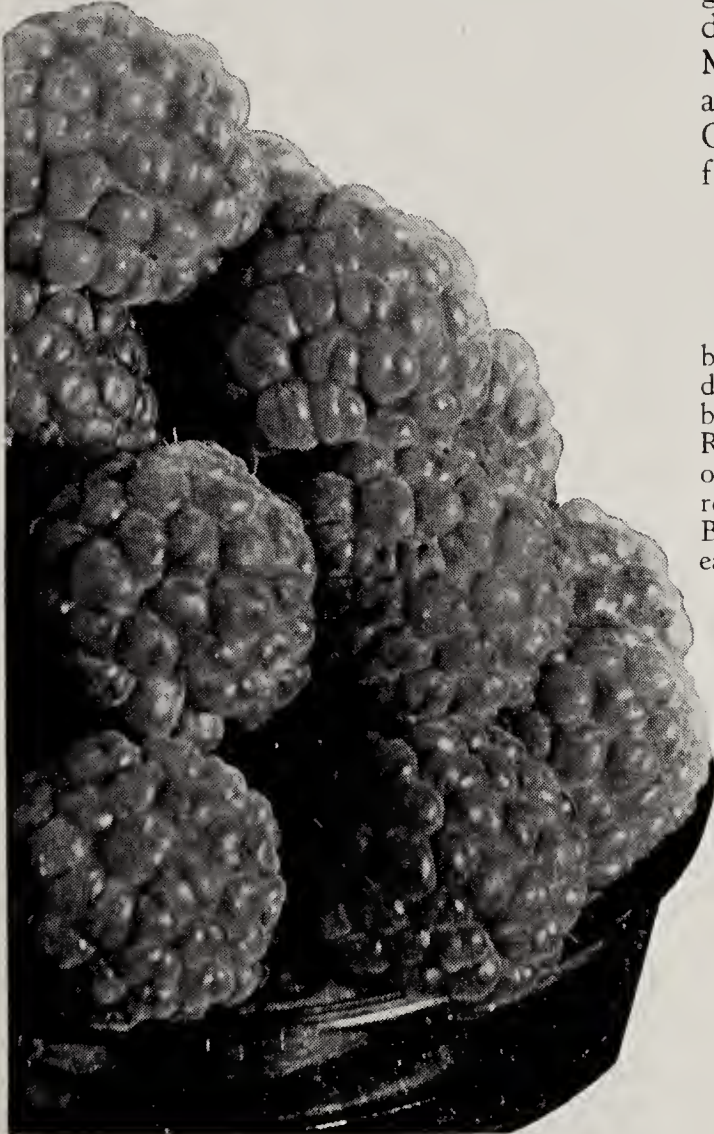

A well-known leading late variety all over the country. The canes are very thrifty growers, upright in shape, light yellow in color. Fruit is dark red, large, oblong in shape, and firm enough to stand shipping in pint boxes. Very productive. However, it is the flavor of the Cuthbert that gives it distinction. It is sweet, rich, and luscious and surpasses all others for home use and canning.

Chief.

Early King

For many years this has been the favorite early Red Raspberry because it adapts itself readily to all soil and climatic conditions, produces big crops of fine fruit regularly and seems to do well on high, low, light or heavy soils. The Early King is extremely early and enormously productive of large, firm, bright red berries. The berries are very easy to pick and unlike many other varieties, will not turn dark if allowed to become over-ripe. Excellent shipper and will bring top market price.

Latham.

Latham

Latham is now firmly established as the finest and most profitable late Red Raspberry grown today. It has proven enormously productive of giant, dark red berries, uniform in size and decidedly attractive on the bushes or in boxes. This variety has established a reputation on the market and will command highest prices. It is a strong grower; canes are tall and extra heavy with dark green foliage. Having originated in Minnesota, it naturally is extremely hardy and can be planted with success assured. Our Latham plants are strong and free from disease.

St. Regis

(Everbearing Red Raspberry)

St. Regis is the leading fall-bearing Red Raspberry. It bears its berries on tips of new canes during summer and fall months. The same canes bear the following spring like any other Red Raspberry and they ripen early, ahead of any other varieties we offer. Berries are rich crimson-red, firm, medium in size, and of good quality. Bushes are thrifty in growth and free from disease.

Viking

Viking originated at the Vineland Station in Ontario and shows promise of being a valuable new variety. It grows vigorously, is hardy, and produces a moderate number of upright canes, which are practically free from spines. Most of the fruit is borne on the outside of the plants and picking is comparatively easy. The fruit ripens about the same time as that of the Cuthbert.

The fruit is large, firm, and has a bright red color. The berries do not darken in color as they are kept, and they retain their firmness so are good shippers. We urge you to give it a trial.

(500 or more plants of any one variety at 1000 rate).

BLACKBERRIES

Alfred.

Early Harvest

Earliest to ripen and most productive of the early varieties, and demands the top of the market. Berries are long, jet-black, and ripen evenly. Flavor rich and sweet. Very productive. Canes stocky and thrifty.

Lucretia Dewberry

Of the blackberry type, but produced on a trailing vine instead of an upright bush. Does best when supported on a wire like grapes. Vines are thrifty and free from rust and other diseases. Berries are even larger than blackberries, lustrous black, coreless, sweet and juicy. Ripens about ten days earlier than blackberries. A paying proposition on a commercial scale and especially valuable for home use in desserts, jams and jellies.

Alfred

Alfred is a healthy, vigorous grower and produces nearly a full crop of fruit the year after planting. It is perfectly hardy and can be grown anywhere without winter protection. Alfred ripens a week to ten days earlier than Eldorado, producing a heavy crop of fruit. The berries are a glossy jet black, the flavor sweet and delicious, and it is nearly seedless and coreless. The berries are larger than the average blackberry, many of them measuring $1\frac{1}{2}$ inches in length. A Michigan origination well worth a trial.

Eldorado

Eldorado is the hardiest blackberry under cultivation and will withstand the northern climate uninjured. Always free from disease, immune to orange rust. The canes are very vigorous and their yield of fruit is enormous. The berries are large, jet-black, borne in large clusters and ripen well together. They are large, sweet, melting and pleasing to the taste, have no hard core and keep four to five days after picking with quality unimpaired. Without question Eldorado is the leading commercial Blackberry everywhere.

Eldorado.

(500 or more plants of any one variety at 1000 rate).

GARDEN ROOTS

Martha Washington Asparagus

This variety is the result of careful breeding by the U. S. Department of Agriculture, Washington, D. C., with the object of eliminating rust. It produces large, straight shoots of a dark green color. The tips are tight and firm and do not open out or begin to branch until well out of the ground; a very valuable feature.

Nothing that comes out of the home garden is so much appreciated as the tender tips and fresh stalks of asparagus. A small bed of them kept weed-free, or a border along the garden edge, will supply the average table for six weeks or more in late spring.

In planting, make the soil rich; dig trench, set 12 to 18 inches apart, roots spread out, crown two inches below surface, and tamp soil well about the roots.

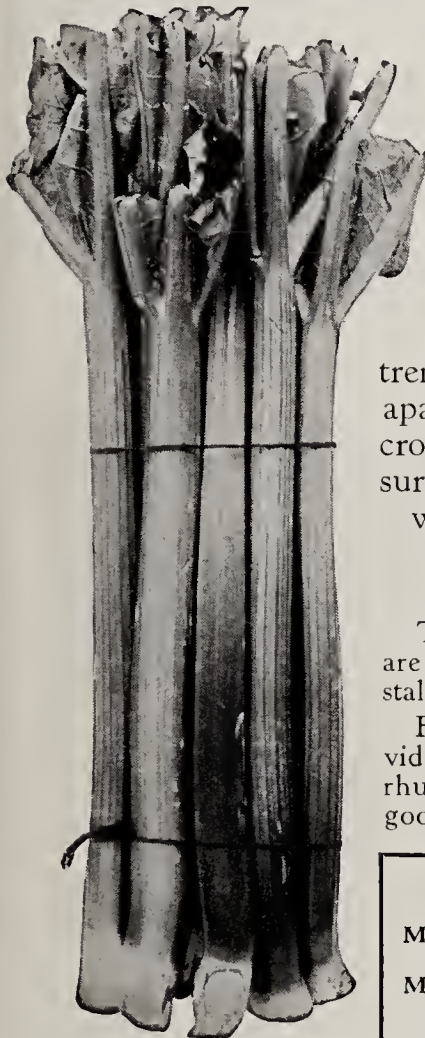

Martha Washington Asparagus.

Myatt's Linnaeus Rhubarb

This Rhubarb differs greatly from the old "pie plant" and the stalks are very large, tender, juicy, and mild in flavor. The yield is abundant and stalks can be cut much earlier than common varieties.

For home use our Myatt's Linnaeus Rhubarb is excellent, as it provides material for early spring pies and desserts. Buyers demand select rhubarb, and as this is the earliest fruit of the year it never fails to bring a good price. Grow and market rhubarb in connection with your asparagus.

Myatt's Linnaeus Rhubarb.

GARDEN ROOT PRICES FOR 1934								
	25	50	75	100	200	300	400	1000
Martha Washington Asparagus								
1 yr. No. 1	\$0.35	\$0.50	\$0.65	\$0.80	\$1.25	\$1.65	\$2.00	\$4.50
Myatt's Linnaeus Rhubarb								
1 yr. No. 1, 6c each, 6 for 30c; 12 for 50c;.....	.90	1.70	2.35	2.70	4.80	6.50	7.20	18.00
(500 or more of one variety at 1000 rate.)								

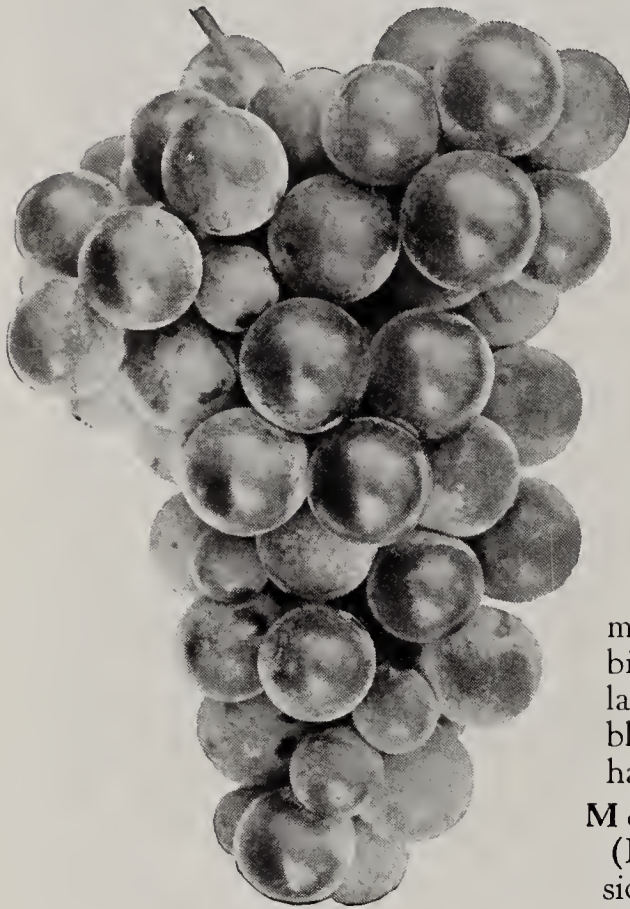

Following we give most common planting distances for berry plants and number of plants required per acre.

	Distance apart	No. plants per acre
Strawberries	4 ft. x 18 in.....	7,000
Red Raspberries	6 ft. x 3 ft.....	2,400
Black Raspberries	7 ft. x 4 ft.....	1,550
Blackberries	8 ft. x 4 ft.....	1,350
Grape Vines	8 ft. x 10 ft.....	550

If you prefer to plant other distances than those listed, here is a simple rule to determine the number of plants required for an acre. Multiply the distance between rows, in feet, by the distance between plants in the row, in feet. This will give the number of square feet required for one plant. Divide this into 43,560, the number of square feet in an acre, and the result will be the number of plants you will need for one acre of ground.

SELECTED GRAPES

Easy to Grow — Good for a Lifetime

Concord.

Campbell's Early (Black). The characteristics which give this grape its merit are high quality, freedom from foxiness, small seeds, earliness of maturity, large size and attractive appearance of bunch and berry. Has good keeping qualities. Very hardy. Especially desirable for fancy table use.

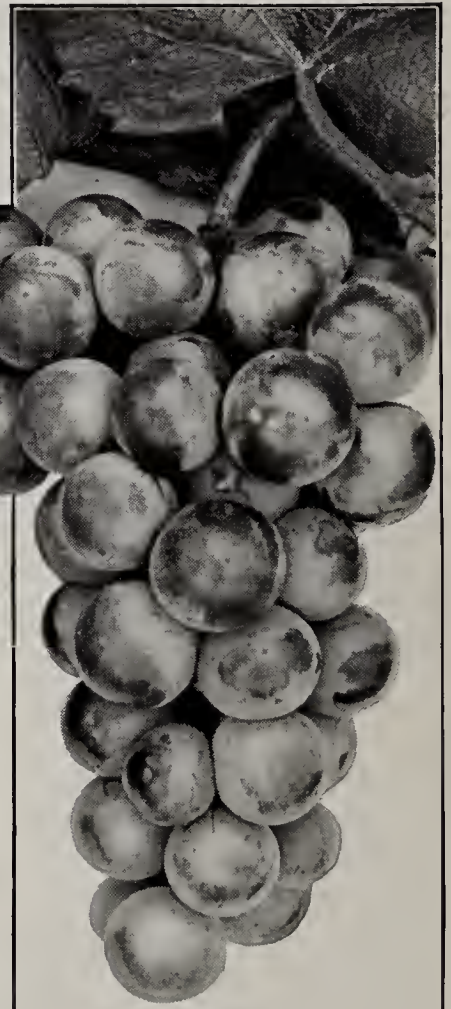

Catawba (Red). A well-known, chocolate-colored grape of a rich musky flavor. A great wine grape; fine for dessert. Bunches large and loose; berries large and coppery red, becoming purplish when well ripened. Ripens soon after Concord.

Concord (Black). Still the most popular grape in America, and grown with success in every state in the union. It will adapt itself to almost any condition of soil and climate and is the biggest money maker of grapes. The bunches are large and well filled, and berries are large, purplish black, and of excellent quality. Vines are vigorous, hardy, and free from disease.

Moore's Early (Black). We consider this the best early commercial

grape. It ripens two or three weeks ahead of Concord. Bunches are large, rather loose, berries covered with a purplish bloom. Vines are vigorous, hardy and productive. Fruit holds up fine for marketing and has a sweet luscious flavor of its own.

Niagara (White). The leading commercial White Grape. More productive than other white varieties. The quality of Niagara compares with Concord, being superb for home use or shipping. Bunches are large and compact, berries large and of attractive appearance. In great demand as a table and wine grape.

Hardy Northern Grown FRUIT TREES

Our Fruit Trees are all graded to the standards of the American Association of Nurserymen. Peach trees are all 1-yr. 9/16-inch caliper, and up, 4 to 6 ft. high. All other trees are 2-yr. 9/16-inch caliper, and up, 4 to 6 ft. high.

Some firms are listing this same grade of trees as a 5 to 6 ft. tree, thus attempting to give the impression that their stock is larger. Do not be misled—buy your trees by caliper. Remember, our trees are all 9/16-inch caliper, and up. This size is too large for parcel post shipment without severely pruning the trees, and is best shipped by express.

Apples

BALDWIN. Leading commercial winter apple for market or storage. Large glossy red fruit with very firm flesh. Good flavor, good cooker, good keeper.

CORTLAND. New. Bears very young. Fruit large, beautiful dark red striped with carmine and yellow. Flesh fine grained, crisp and juicy, white and firm. Ripens about two weeks after McIntosh.

DELICIOUS. Grand champion of winter apples. Red with pin dots of yellow. Fine grained, crisp, juicy, with mild, pleasant flavor. Ranks with the best winter varieties.

HYSLOP CRAB. Leading Crab for home use and market. Large, round, with yellow skin and red coloring, overspread with purple bloom. Flesh yellow, crisp, juicy.

JONATHAN. Beautiful red winter apple, highly colored and flavored. Flesh tender, juicy and rich. Excellent keeping qualities. Trees bear young and heavily.

McINTOSH RED. Late fall. Bright red, spicy flavored, medium size fruit. Highest quality for home use and market.

NORTHERN SPY. Extra large, greenish yellow winter apple with red markings. Highly flavored, excellent for eating, cooking and storage. Trees hardy and productive.

Baldwin
Apple.

ROME BEAUTY. A large, good quality, winter apple. Round, yellowish color striped with red. Is thick skinned, stands handling well and is a good keeper. Appearance and size are its valuable points. Bears young.

STAYMAN'S WINESAP. Late fall. Dark red, tinged yellow, with rich, enticing flavor. Succeeds everywhere. Excellent for eating and market.

WEALTHY. Early fall. Large, round apple with smooth skin and dark red markings. Flesh white, tender and sub-acid.

YELLOW TRANSPARENT. Best early apple. Waxy yellow fruit of good size. Flesh white, mild, juicy and sweet. Covers long fruiting season. Tree vigorous and very productive. Ripens in July. Bears in 3 to 4 years.

PRICE OF APPLE TREES. All varieties, 2-yr. 9/16 in., 4 to 6 ft. trees, 30c each; 10 for \$2.75; 100 for \$25.00. Express only.

Peaches

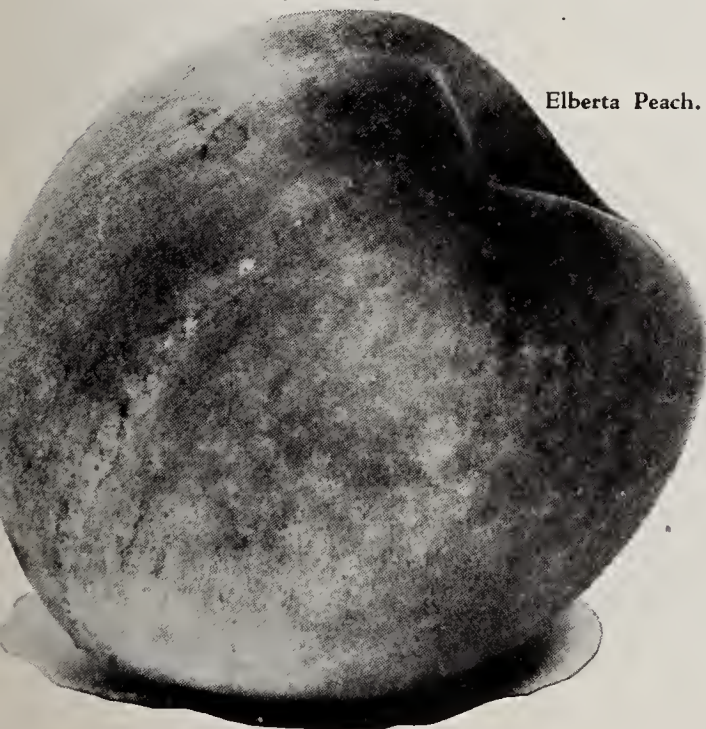

ELBERTA. The standard market peach of the country. Very large, red blush; flesh yellow, tender, and juicy. Rank, vigorous grower. Freestone. Ripens middle of September.

J. H. HALE. Fruit extra large. Ripens a week earlier than Elberta and averages a third larger in size. Color beautiful golden yellow with deep carmine blush. Flavor is extra fine.

ROCHESTER. First large yellow freestone peach to ripen. Fruit sweet, juicy, and of delicious flavor. Excellent market or home use variety.

SOUTH HAVEN. Early yellow freestone. Has all the good qualities of Elberta but ripens two weeks earlier. Very similar to Elberta in every way. Grows everywhere and planting heavily of South Haven.

PRICES OF PEACH TREES. All varieties, 1-yr., 9/16 in., 4 to 6 ft. trees, 25c each; 10 for \$2.25; 100 for \$20.00. Express only.

Elberta Peach.

Cherries

EARLY RICHMOND (Sour). Best early cherry, much like Montmorency, except a little smaller and trifle more acid. A good standard sort. Bright red and juicy. Heavy bearer.

MONTMORENCY (Sour). Large, late, heavy cropper of dark red cherries. Thick meated and juicy, yet the best shipper known. Its size and flavor as well as general appearance make it the leader everywhere as a main crop cherry.

BLACK TARTARIAN (Sweet). Very large purplish black, heart shaped; flesh mild and sweet, and quality excellent. Good market sort and we recommend it as the best sweet for home use. Ripens in July.

NAPOLEON (Sweet). Fruit is very large, oblong, light lemon-yellow with a red cheek. Tree is medium size and erect. A beautiful and delicious fruit.

PRICES OF CHERRY TREES. Sour, 2-yr., 9/16 in., 4 to 6 ft. trees, 27c each; 10 for \$2.50; 100 for \$22.50. Sweet: 2-yr., 9/16 in., 4 to 6 ft. trees, 35c each; 10 for \$3.25; 100 for \$30.00.

Clapp's Favorite Pear.

Plums

BRADSHAW. A splendid early. Large, dark violet red. Flesh yellow, juicy, good. Fine for canning or market. Ripens in August.

BURBANK. Most profitable market variety. Fruit large, oval, with reddish purple skin. Heavy yielder, hardy, and bears young. Flavor excellent. Ripens in August.

GERMAN PRUNE. Old favorite. Fruit is long, oval, purple with a thick blue bloom. Flesh is firm, sweet and pleasant. Highly esteemed for canning and drying. Ripens in September.

YELLOW EGG. Most popular yellow plum. Very hardy, trees grow rapidly, and produce abundantly. Fruit is medium to large, rich yellow in color. A showy market plum, and excellent for canning. Ripens late August.

PRICES OF PLUM TREES. All varieties, 2-yr., 9/16 in., 4 to 6 ft. trees, 35c each; 10 for \$3.25; 100 for \$30.00. Express only.

Black Tartarian Cherries.

Pears

BARTLETT. The leading commercial and home use pear. Big producer. Early; golden colored, sometimes with red cheek. Flavor is melting, rich and buttery. Good for any and every use. Ripens about first of September.

CLAPP'S FAVORITE. Ripens early August. A large pale yellow pear with red cheek. Tree hardy and vigorous and does well everywhere. Fruit fine grained, sweet and highly flavored.

DOUGLAS. Beautiful, large smooth pear with golden yellow color, flecked with russet. Flavor delicious, sweet, melting and juicy. Claimed to be blight-proof. A regular cropper in all soils. Bears young.

SECKEL (Sugar Pear). Widely grown for table use and preserving, pickling, etc. Fruit is small, very rich in flavor, and attractive in appearance. Tree grows anywhere and bears heavily.

PRICES OF PEAR TREES. Any varieties, 2-yr., 9/16 in., 4 to 6 ft. trees, 30c each; 10 for \$2.75; 100 for \$25.00. Express only.

German Prune Plums.

Select Beautiful Roses

Bush Roses

All strong 2-year field grown bushes

H. P.—Hybrid Perpetual. H. T.—Hybrid Tea

PRICE: Each, 35c; 3 for \$1.00; 5 for \$1.50.

BETTY UPRICHARD (H. T.) Salmon-pink flowers. Copper-red buds.

FRAU KARL DRUSCHKI (H. P.) Large, snow white, free bloomer. Popular.

LOS ANGELES (H. T.) Flaming pink, richly shaded gold. Fragrant.

MADAME CAROLINE TESTOUT (H. T.) Bright satiny pink. A popular rose.

MADAME EDOUARD HERRIOT (H. T.) Coral-red shaded yellow and bright rosy-scarlet. One of the most brilliantly colored roses.

MRS. AARON WARD (H.

T.) Center Indian yellow, edge primrose. Dwarf grower.

PAUL NEYRON (H. P.) Deep rose, immense size. Hardy; vigorous.

RED RADIANCE (H. T.) Bright rosy-red. Large. Very fragrant.

SOUV. DE CLAUDIUS PERNET (H. T.) Lovely sun flower yellow, deeper toned at center. Vigorous and branching.

ULRICH BRUNNER (H. P.) Rich cherry-red. Fine form. Valuable.

Red Radiance.

Climbing Roses

Strong 2-year field grown.

PRICE: Each, 25c; 3 for 65c; 5 for \$1.00.

CRIMSON RAMBLER. Dazzling scarlet-red. Borne in large sprays.

DOROTHY PERKINS. Soft shell-pink in large clusters.

EXCELSA. Bright crimson in large clusters. Vigorous and hardy.

GARDENIA. Large, creamy yellow flowers. Vigorous.

PAUL'S SCARLET CLIMBER. Semi-double. Vivid shining scarlet.

WHITE DOROTHY PERKINS. Double white. Borne in large clusters.

Japanese Barberry.

Beautiful Hedges

BARBERRY, Japanese. Probably the most common and hardiest of hedge plants. Also used for grouping in front of taller growing shrubs and for individual specimens on the lawn. A dwarf, compact shrub with many small leaves which change to orange-red and bronze in the autumn. Bright red berries are present and remain throughout the winter. 12 to 15 in. hedging grade, 25 for \$1.25; 100 for \$4.00. Heavy 18 to 24 in., each, 25c; 3 for 65c; 10 for \$1.90.

BARBERRY, Japanese Red Leaf. Produces a brilliant and luxurious appearance in the landscape. The color is a rich bronzy red but must be planted in full exposure to the sun to bring out brightest coloring. In all other respects it is like the common Japanese Barberry, attaining its beautiful orange and bronze coloring in fall, and bearing red berries throughout the winter. 12 to 15 in., each, 20c; 3 for 55c; 10 for \$1.75.

PRIVET, Amoor River North. Amoor Privet is the hardiest of all privets, and the only kind recommended for the North. The foliage is dark, glossy green, not subject to blight, and is retained far into the winter. White flowers are followed by berries. Plant one foot apart and cut tops back one-half when planting to insure a bushy growth from the bottom. Keep sheared to any desired height and shape. 2 to 3 ft., 25 for \$1.50; 50 for \$2.50; 100 for \$4.00. 3 to 4 ft., 25 for \$1.75; 50 for \$3.00; 100 for \$5.00.

Hardy Ornamental Shrubs

ALTHEA (Rose of Sharon) Strong, erect growing shrub of easiest culture. Perfectly hardy and prolific bloomer. Large showy flowers in late summer when few other shrubs are in bloom. Colors: White, red, pink, and blue, all double. State colors wanted. 2 to 3 ft., each, 20c; 3 for 55c; 10 for \$1.75.

BUTTERFLY BUSH (Summer Lilac).

Produces an abundance of lilac colored flowers the first season planted. Blossoms are in long graceful spikes that usually last from midsummer until frost and have a marked attraction for butterflies. The tops in severe winter will freeze back but it pushes with such renewed vigor that this is not harmful. 2-yr. No. 1 plants, each, 25c; 3 for 65c; 10 for \$1.90.

Butterfly Bush.

DOGWOOD (Red-branched). A very

hardy, thrifty shrub, doubly attractive because of its creamy white flowers in early summer followed by clusters of white berries, and its very conspicuous blood-red branches throughout the winter. 18 to 24 in., each, 15c; 3 for 40c; 10 for \$1.00.

Pink Tartarian Honeysuckle.

DEUTZIA, *Pride of Rochester*.

Shrub attaining a height of 4 to 6 feet, producing large clusters of white bloom in early June. The foliage effect is good and it is a strong grower. 18 to 24 in., each, 15c; 3 for 40c; 10 for \$1.00.

FORSYTHIA (*Golden Bell*). Bright

yellow bell-flowers produced in clusters all along the branches. Flowers appear before leaves in April. 18 to 24 in., each, 15c; 3 for 40c; 10 for \$1.00.

HONEYSUCKLE, *Pink Tartarian*.

Small, fragrant, pink flowers early in spring followed by red berries. Glossy green leaves. 18 to 24 in., each, 20c; 3 for 55c; 10 for \$1.75.

HYDRANGEA A. G.

(*Hills of Snow*). A pure white summer blooming Hydrangea sometimes called Snowball Hydrangea. Pure white flowers borne in pyramidal panicles

5 to 8 inches in diameter and 8 to 10 inches long. 18 to 24 in., each, 25c; 3 for 65c; 10 for \$2.00.

HYDRANGEA P. G. Flowers in August and continues until frost, bearing and continues until frost, bearing immense panicles of bloom a foot long, white at first, turning to rose-pink and bronze in autumn. The most popular of Hydrangeas. 18 to 24 in., each, 25c; 3 for 65c; 10 for \$2.00.

JAPANESE QUINCE. The scarlet-red flowers appear all along the branches before the leaves and are followed by globular yellow quince-like fruits. Often used for hedges. 18 to 24 in., each, 25c; 3 for 65c; 10 for \$2.00.

Japanese Quince.

Hydrangea P. G.

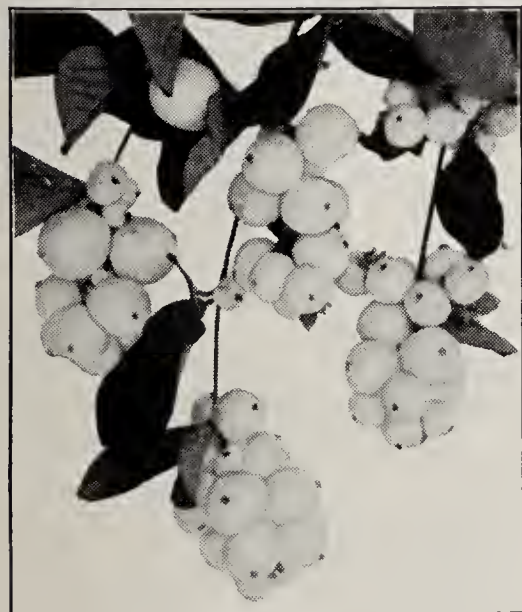

—for Beautifying the Home

Kolkwitzia—Beauty Bush.

Weigela, Eva Rathke.

White Snowberry.

KOLKWITZIA (The New Beauty Bush). New and rare shrub from China. Covered early in May with profusion of small bell shaped, clear pink flowers with brownish spots and veins. Delicate foliage tinted bronze. Hardy, medium size bush. 18 to 24 in., each, 35c; 3 for \$1.00; 10 for \$2.75.

LILAC, Persian Purple. A decided improvement over the common Lilac. Large loose panicles of purple flowers early in spring. Healthy, shiny foliage. 18 to 24 in., each, 15c; 3 for 40c; 10 for \$1.00.

SPIREA, Anthony Waterer. Produces large trusses of deep crimson flowers about midsummer and continues to bloom for several weeks. Used extensively in foundation plantings as it only attains a height of about 3 ft. 9 to 12 in., each, 15c; 3 for 40c; 10 for \$1.00.

SPIREA VAN HOUTTEI (Bridal Wreath). A leader among shrubs and a beautiful ornament at all seasons. A round and graceful bush with arching branches, covered with white flowers in the spring. 18 to 24 in., each, 15c; 3 for 40c; 10 for \$1.00; 100 for \$8.00.

SNOWBERRY, Red (Coralberry). A slender branched upright shrub with very persistent foliage and purplish-red fruit that hangs on well into winter. Also known as Indian Currant. Flowers small and rose-colored. 18 to 24 in., each, 15c; 3 for 40c; 10 for \$1.00.

SNOWBERRY, White (Common Snowberry) Small rose-colored flowers in June, followed by large clustered, milk white fruits, which remain far into the winter. Leaves remain late in the fall. 18 to 24 in., each, 20c; 3 for 55c; 10 for \$1.50.

SYRINGA (Philadelphus) (Virginal). Blooms throughout the season. One of the most beautiful new varieties of Mock Orange. A vigorous, tall grower, very large, double-crested flowers with round petals; pure white, sweetly scented clusters of blossoms. 18 to 24 in., each, 25c; 3 for 65c; 10 for \$1.75.

SYRINGA (Philadelphus Coronarius). The old fashioned Mock Orange. Beautiful, sweet scented white flowers with a creamy tinge. Flowers in May and June. 18 to 24 in., each, 20c; 3 for 50c; 10 for \$1.50.

WEIGELA, Eva Rathke. Large, brilliant crimson flowers completely cover the whole plant during early summer and on the new growth in autumn. One of the newer, very popular Weigelas. 18 to 24 in., each, 30c; 3 for 80c; 10 for \$2.00.

WEIGELA, Rosea. Deep pink, trumpet-shaped flowers cluster along the stems. Fine for cutting. A graceful shrub. Blooms in May and June. 18 to 24 in., each, 15c; 3 for 40c; 10 for \$1.00. 2 to 3 ft., each, 20c; 3 for 55c; 10 for \$1.50.

Spirea, Van Houttei.

Red Snowberry.

BARGAIN NO. 5

Rokely's Choice Gladioli

Standard Varieties

We are offering two sizes in our Standard Varieties. The first size, or large bulbs, indicated by letter "L", are all $1\frac{1}{4}$ inches and up in diameter. Our second, or medium size bulbs, indicated by letter "M", are all $\frac{3}{4}$ inch to $1\frac{1}{4}$ inches in diameter.

PRICES: "L" bulbs, each, 5c; 40c per dozen; \$2.00 per 100. "M" bulbs 25c per dozen; \$1.25 per 100. These prices are postpaid to your door. 50 bulbs at the 100 rate; 6 at the dozen rate. However, only one variety and size can be used to secure dozen or 100 rate.

ALICE TIPLADY. Grand, large primulinus of beautiful orange saffron.

AMERICA. Soft pink with brighter pink blotch.

ANNA EBERIUS. Dark velvety purple, throat deeper.

BARON J. HULOT. Deep indigo-blue with fine hairlines of gold.

CAPT. FRYATT. Large bright red with white tracings in throat.

CRIMSON GLOW. Giant flowers of brilliant crimson on tall spikes.

DR. W. VAN FLEET. Tall, beautiful rose pink, with cream throat.

EVELYN KIRTLAND. Brilliant rose pink with scarlet blotches; extra fine.

GRETCHEN ZANG. Grand rose-pink blending into scarlet on lower petals.

HALLEY. Large open flowers of delicate salmon-pink; extra early.

HERADA. Large pure mauve, glistening and clear

IDA VAN. Large, glowing, brilliant, velvety pure scarlet.

LE MARECHAL FOCH. Very large flowers of a fine shade of rose-pink.

LILY WHITE. Earliest pure white. Substance and arrangement fine.

MARY FENNELL. Light lavender, shading paler, with soft primrose yellow throat.

MRS. FRANCIS KING. Long spikes of immense flowers of light scarlet or flame-red, shaded salmon, with deeper red throat.

MRS. FRANK PENDLETON. Giant rose-pink with deep crimson blotch. Tall spikes.

MRS. H. E. BOTHIN. Light geranium-pink. Flame-scarlet center.

MYRA. Salmon-scarlet prim on yellow ground.

NIAGARA. Delightful cream blending to canary-yellow.

1910 ROSE. Pure deep rose-pink. White center lines on lower petals.

PANAMA. Soft lavender-pink. Large flowers.

PEACE. Large pure white with pale lilac featherings on lower petals.

ROSE ASH. Corinthian red shading to ashes of roses color on outer edges.

SCARLET PRINCEPS. Large deep scarlet flowers with darker throat.

SIDONIA. Amaryllis formed flowers of clear violet.

SOUVENIR. Best pure yellow prim. Perfect flowering; purest golden yellow.

SPLENDORRA. Splendid very dark wine-black. Rich; distinct.

Select Varieties

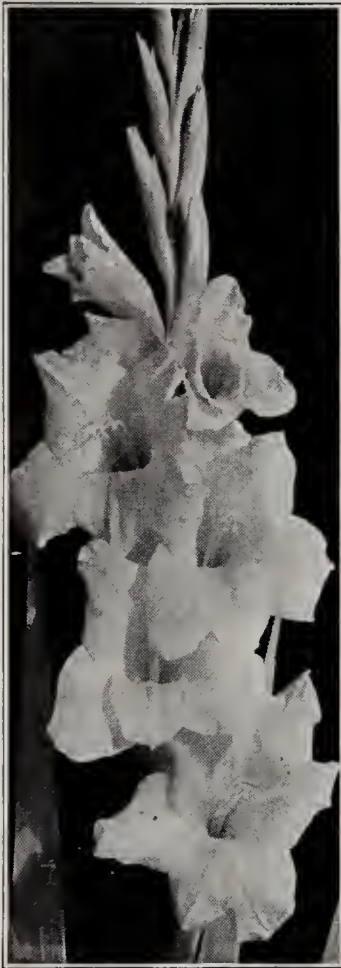

PRICE: "L" bulbs, each, 6c; dozen 50c; 100 for \$3.00, postpaid.

GOLDEN DREAM. An extremely tall rich yellow. Several finely formed, well-placed blooms open at one time. Fine exhibition variety.

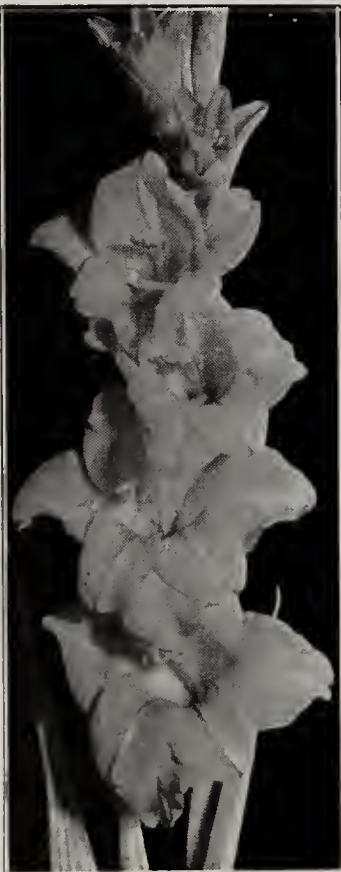

MRS. LEON DOUGLAS. Begonia-rose striped with flame and brilliant scarlet. Flowers very large and many open at one time. Spikes often 6 ft. high.

PERSIA. Very deep black-red. Midseason. Flowers of good substance on tall spikes. Very popular.

W. H. PHIPPS. A glorious flower of La France pink, overlaid with light rose, lighter towards center. As many as 12 to 16 flowers open at one time.

Mrs. Leon Douglas.

Mrs. Francis King.

Golden Dream.

Sidonia.

Rokely's Select Gladioli

New Varieties

PRICE: 'L' bulbs, each, 15c; dozen \$1.25; 100 for \$10.00, postpaid.

AFLAME. A giant, flame-red prim. Both individual florets and the spike of this variety are huge.

BETTY NUTHALL. Undoubtedly one of the finest varieties ever originated. The florets are the richest salmon-orange shading to yellow in the throat. The spike is extremely tall and straight. 8 to 10 perfectly placed flowers open at once.

MARMORA. A gigantic silver-gray with a rose throat. Because of its exotic beauty Marmora has been acclaimed as the most unusual Glad ever to reach the American glad fan.

MOTHER MACHREE. A beautiful golden lavender smoky that is very difficult to describe. It is very beautiful and immensely popular. 6 to 10 well-placed blooms open at one time.

GLADIOLUS BULBLETS

For those wishing to grow their own bulbs we offer bulblets from our Rainbow Mixture. Under favorable conditions many of these bulblets will throw a flower spike the same summer as planted. They will grow into large bulbs in two summers. We furnish full instructions for planting with each order but give no warranty as to germination. PRICE, postpaid, 300 bulblets 25c; 1500 bulblets for \$1.00.

Aflame.

ROKELY'S RAINBOW MIXTURE

This is a special garden collection made up of dozens of the best varieties mixed. When in full bloom they furnish a veritable riot of colors that will thrill any true flower lover. PRICE: POSTPAID, "L" bulbs, 30c per doz., \$1.50 per 100. "M" bulbs, 20c per doz., \$1.00 per 100. For the commercial grower, "L" bulbs at \$7.50 per 1,000. "M" bulbs at \$5.00 per 1,000. NOT PREPAID.

Giant Darwin TULIPS

We will have a nice clean lot of Darwin Tulips in mixture ready for shipment at planting time this coming fall. These are all large No. 1 bulbs and we are pricing them very low, quality considered. Include with your order for other stock this spring or send in for them when you are ready to plant. PRICE: 40c per doz., \$2.00 per 100, postpaid.

Hardy Perennials

Strong 2-yr., field-grown plants.

ALYSSUM (Dwarf Goldentuft, Madwort). Broad masses of bright yellow flowers in early spring. Excellent for rockery or front of borders. Each, 10c; 3 for 25c; 10 for 75c.

COLUMBINE (Aquilegia). Columbines are always beautiful, but in our long spurred Hybrids you have a glittering display of highly colored, large long spurred flowers that are absolutely unequalled. Each, 10c; 3 for 25c; 10 for 75c.

GAILLARDIA (Blanket Flower). Flowers of gorgeous coloring from June to frost. The center is dark red-brown, while the petals are marked with rings of brilliant crimson, orange, and vermilion. Each, 12c; 3 for 30c; 10 for 90c.

Hibiscus.

GYPSOPHILA (Baby's Breath). Flowers are white, small but produced in great abundance. July to September. Excellent for mixing in bouquets of other flowers. Each, 10c; 3 for 25c; 10 for 75c.

HIBISCUS (Giant Flowering Mallow). Blooms freely from early July to late September, with striking flowers 6 to 8 inches across. Most beautiful and hardy of all herbaceous plants. Mixed colors. Each, 10c; 3 for 25c; 10 for 75c.

TRITOMA (Red Hot Poker). One of the most striking groups of plants in cultivation, with their pyramidal spikes of blazing red, tubular flowers, shading to salmon-rose at edge, and having long protruding anthers. Each, 10c; 3 for 25c; 10 for 75c.

Hardy Climbing Vines

CLEMATIS, Paniculata. A Japanese plant possessing unusual merit. Very rapid grower, quickly covering trellises and arbors with handsome, clean, glossy green foliage. Flowers are medium size, pure white, borne in immense sheets and of a most delicious fragrance. Each, 30c; 3 for 80c.

HONEYSUCKLE, Hall's Japanese. A strong, vigorous evergreen variety, with pure white flowers, changing to yellow. Very fragrant; covered with flowers from June to November. Each, 25c; 3 for 65c.

WISTERIA, Chinese Purple. Strong, rapid grower, desirable for trellises, porches, etc. The light purple flowers are very showy and are produced in long racemes. Perfectly hardy. Each, 30c; 3 for 80c.

Tritoma.

Chinese Purple Wisteria.
